EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The following amendments to use "second processing unit" language were approved in a telephone interview with Keith Baxter on December 7, 2005.

The application has been amended as follows:

In claim 1 line 14, please change the line to read "...generated by the primary and **second** processing..."

In claim 2 line 2, please change the line to read "...first housing and the **second** processing unit..."

In claim 2 line 4, please change the line to read "...primary and **second** processing units."

In claim 4 line 2, please change the line to read "...wherein the primary and **second** processing units..."

In claim 5 line 2, please change the line to read "...wherein the primary and **second** processing units..."

In claim 9 line 4, please change the line to read "...generated by the primary and **second** processing units..."

Art Unit: 2114

In claim 23 line 10, please insert a semicolon so that the line reads "standard program;"

In claim 30 line 1, please insert "The method of claim 23 wherein step (b) loads..."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Specifically, Pomaranski ('530) teaches special program instructions requiring redundant execution for additional reliability and Linger ('380) teaches a shadow processing system without the different levels of program reliability.
